

BHUSHAN JAIN

Data Engineer

Phone: 7066858602 | Email: bhushanjain311997@gmail.com

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience designing and implementing cloud-based data engineering solutions on Azure. Skilled in migrating large datasets from on-premise Oracle/SQL Server to Azure Data Lake Storage (ADLS) and Azure Synapse Analytics. Proficient in building scalable ETL/ELT pipelines using PySpark on Azure Databricks and orchestrating workflows with Azure Data Factory (ADF) and Apache Airflow. Strong expertise in SQL, Python, and PySpark for complex data transformations, optimization, and automation.

WORK EXPERIENCE

Data Engineer

July 2022 – Present

- Led the end-to-end cloud migration and modernization of enterprise-scale datasets (CRM, Billing, and Order Management Systems) from legacy on-premise Oracle environments to Azure Cloud (ADLS, Databricks, Synapse Analytics).
- Architected and developed scalable ETL pipelines in PySpark on Databricks to process 2TB+ of daily high-velocity data, including complex transactional billing records and semi-structured telemetry, improving overall processing efficiency by 20%.
- Automated cross-functional workflows using Azure Data Factory (ADF) and Apache Airflow, streamlining synchronization of diverse CRM and OMS data sources and reducing manual intervention by 30%.
- Optimized PySpark transformation logic and partitioning strategies, achieving a 15% reduction in cloud compute costs while handling large-scale joins across massive billing and customer tables.
- Implemented robust monitoring and alerting frameworks to ensure SLA-driven delivery, reducing pipeline downtime by 25% and accelerating business-critical reporting from 24 hours to near real-time.
- Partnered with cross-functional stakeholders and SMEs to translate complex business requirements into technical data models, enabling deeper insights into customer lifecycles and order fulfillment.
- Architected and implemented end-to-end Medallion pipelines (Bronze-Silver-Gold) using Unity Catalog to centralize metadata and enforce fine-grained access control across workspaces.

Associate Engineer

July 2020 – June 2022

- Developed real-time Spark Streaming applications to ingest and process Kafka data.
- Implemented window-based aggregations on streaming data to identify real-time trends and patterns.
- Designed and implemented star and snowflake schemas for CRM and OMS applications, integrating modules such as Customer Profile, Billing, Payments, and Transactions.
- Built fact and dimension tables with well-defined primary and foreign key relationships, ensuring referential integrity to support complex analytical queries.
- Applied normalization and denormalization strategies to balance storage efficiency and query performance.
- Developed ER diagrams (ERDs) to visualize entity relationships and data flow, improving collaboration with developers, analysts, and business stakeholders.
- Orchestrated scalable batch and streaming pipelines using Azure Data Factory (ADF) to ingest high-volume transactional data into ADLS Gen2.

SKILLS

Cloud Platforms: Azure Data Factory (ADF), Azure Databricks, Azure Data Lake Storage (ADLS), Azure Synapse Analytics

Big Data & ETL: PySpark, Spark SQL, Apache Spark, Apache Airflow, ETL/ELT Pipelines

Programming Languages: Python, SQL

Data Modeling: Star & Snowflake Schemas, Data Modeling, Normalization/Denormalization, ERDs

Streaming: Spark Structured Streaming

Tools: Azure DevOps, YARN
CI/CD Tools: GitHub, Jenkins

EDUCATION

- M.Tech — VIIT, Pune | Jun 2018 – May 2020
- B.E. — D.N. Patel College of Engineering, Shahada | Jun 2015 – May 2018
- Diploma — Government Polytechnic, Nandurbar | Jun 2012 – May 2015

CERTIFICATIONS

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
- Microsoft Azure AI Fundamentals (AI-900)

AWARDS & RECOGNITION

- Employee of the Month — Amdocs: Outstanding production support, bug analysis, and incident resolution.
- Client Appreciation Award — USCC (US Cellular) for rapid resolution of high-priority production defects.
- Townhall Recognition — Senior Management for operational efficiency and quality delivery.
