

BHUSHAN JAIN

Application Reliability & Technical Support Engineer | Escalation Management | Python | SQL | RCA & Incident Resolution

bhushanjain1431@gmail.com | 8668490792 | Pune, Maharashtra | linkedin.com/in/bhushan-jain-6ba886149

PROFESSIONAL SUMMARY

Technical support and application reliability professional with 4+ years managing high-volume ticket queues, technical escalations, and cross-functional incident resolution in large-scale Telecom and Enterprise Automation environments (Amdocs / US Cellular). Skilled in SLA-driven ticket ownership, root cause analysis, data validation, and configuration/operational changes, with hands-on proficiency in Python, Oracle SQL/PL-SQL, and MySQL for troubleshooting and analysis. Proven track record coordinating with Engineering, DBA, Infrastructure, and Business stakeholders to drive rapid issue resolution, reducing manual effort by up to 60% and sustaining full SLA compliance. Comfortable working independently in fast-paced, high-ownership environments, contributing to SOPs and knowledge base documentation, and applying AI tools to improve personal productivity. Recognised with Employee of the Month and Client Appreciation awards.

CORE COMPETENCIES

Technical Escalation & Ticket Management (SLA-driven) | Root Cause Analysis & Incident Investigation | Stakeholder Management & Cross-Functional Coordination | Data Validation, Analysis & Troubleshooting | Python 3 & Scripting for Automation | Oracle SQL / PL-SQL / MySQL | Documentation, SOPs & Knowledge Base | Production Support (L1/L2) | Agile / Scrum | AI-Enabled Productivity Tools

TECHNICAL SKILLS

Support & Ops	Technical Escalation Management, Ticket Triage & SLA Ownership, Incident Management & RCA, Client Setup / Configuration Changes, Production Support (L1/L2)
Languages	Python 3, Shell/Bash/KSH, SQL, PL/SQL
Databases & Querying	Oracle DB, MySQL, PostgreSQL — Query Optimisation, Indexing, Data Validation, PL/SQL Stored Procedures
Frameworks & APIs	FastAPI, REST API Development, JSON/XML Parsing, API Integration
Data Analysis	pandas, Excel, structured reporting/dashboards, log & data analysis.
Python Libraries	pandas, subprocess, smtplib, paramiko, re, os, sys, logging, json, csv.
OS & Automation	Linux (CentOS/RHEL/Ubuntu), Unix, Cron, ETL Pipelines, Batch & Shell Automation
Monitoring & Tools	Dynatrace, BMC Remedy (ITSM), WebLogic, SQL Developer, PuTTY, Sendmail

PROFESSIONAL EXPERIENCE

Python Developer — Technical Support & Reliability · Amdocs (Client: US Cellular — USCC) · Jun 2022 – Present, Pune

- Owned and resolved high-priority technical escalations and support tickets within defined SLAs, coordinating with DBA, Infrastructure, QA, and Business stakeholders during P1/P2 incident bridges; performed RCA and implemented permanent automated fixes to reduce repeat incidents.
- Performed data validation, reconciliation, and troubleshooting on Oracle SQL/PL-SQL datastores — cutting critical query execution time by 50%+ through indexing and execution-plan tuning, directly supporting ticket resolution and analysis.
- Built and maintained Python 3 (OOP, pandas, subprocess, smtplib, paramiko) applications and Flask/FastAPI REST API integrations to automate operational tasks and manual report preparation — reducing telecom order-processing manual effort by ~60% and sustaining full SLA compliance.
- Automated log analysis and real-time exception detection using Python regex and paramiko SSH across Linux production servers; developed alerting and notification workflows that shortened MTTR.
- Contributed to documentation, SOPs, and knowledge base updates; monitored platform health via Dynatrace and BMC Remedy; participated in Agile sprints and peer code reviews. Awarded Employee of the Month and USCC Client Appreciation commendation.

Associate Python & Automation Engineer — L1/L2 Technical Support · Tata Communications Limited · Jun 2020 – May 2022, Pune

- Delivered L1/L2 technical support for network incidents, managing escalations from Customer NOC teams end-to-end and maintaining 99.9%+ service availability.

- Reduced MTTR through Python/Shell log analysis scripts and structured RCA documentation, improving investigative turnaround for recurring issues.
- Developed Python 3 and Shell (Bash/KSH) automation for 10+ routine Unix/Linux operational and support tasks (log rotation, disk alerts, health checks), improving team productivity by ~35%.

KEY PROJECTS

Telecom Order Backlog Automation & Reconciliation Framework | Amdocs / USCC

- Built an end-to-end Python/Oracle SQL framework for identifying, validating, and resolving failed/stuck telecom orders — the same troubleshoot-diagnose-fix workflow required for platform ticket resolution.
- Automated reporting and status corrections via Flask REST endpoints and PL/SQL stored procedures, eliminating manual reconciliation and sustaining full SLA compliance for order management.
- Outcomes: ~60% reduction in manual effort · 50%+ query performance improvement · Employee of the Month & Client Appreciation Award.

Production Monitoring & Incident Management Automation Platform | Amdocs / USCC

- Built a Python/FastAPI monitoring and alerting platform for real-time exception detection and incident diagnostics across Linux production servers, directly supporting L2/L3 escalation response.
- Outcomes: ~50% reduction in manual monitoring effort · improved MTTR · reduced production outages.

CERTIFICATIONS & TRAINING

- Python Programming (Core to Advanced) — Udemy
- Linux Administration & Shell Scripting — Linux Foundation / Udemy
- Oracle SQL & PL-SQL — Oracle University / Udemy
- REST API Design — Postman Academy
- AWS Cloud Practitioner — In Progress (2026)

EDUCATION

M.Tech — VIIT, Pune <i>2018 – 2020</i>	B.E. — D.N. Patel College of Engineering <i>2015 – 2018</i>	Diploma — Govt. Polytechnic, Nandurbar <i>2012 – 2015</i>
--	---	---

AWARDS & RECOGNITION

- Employee of the Month — Amdocs
- Client Appreciation Award — USCC (US Cellular)
- Townhall Recognition by Senior Management — Amdocs
